Address Lookup Feature on User Interface (UI)

VPTIB-04

In VehiclePath's ongoing efforts to improve system reliability and network performance, we have instituted a change in the User Interface (UI) that affects how the customer can lookup addresses attached to tracking data on the 'Locations' section of the UI.

Addresses will no longer appear on the mapping portion of the UI by default. To see the addresses for a vehicle's tracking data, you can either:

1) Click the 'Addresses' button on the UI. (see below) When the Addresses box is checked, the address data will fill in beneath the associated data point.

Address Lookup Feature on User Interface (UI)

VPTIB-04 Cont.

Or

2) Click on the tracking point on the mapping portion of the UI.

Sep 22 10:14 am, Admin Locate - 6 mph
8517 Greenville Ave, Dallas, TX 75243
lat,lng (32.893772,-96.75338)

Customers can also select the 'History' button to generate a history report that has all of the addresses listed with the tracking data.

Date	Address	Latitude	Longitude	Type	Speed	Heading (in degrees)	Distance
2008-08-22 06:40:48	I-40, San Jon, NM 88411	35.18345	-103.05293	Moving	25	251	0.13
