Ability to Generate Geofence Report	No	No	No
Ability to Generate Location History Report	Yes	Yes	Yes

*The 12 hour and 8 hour plans are 2 and 3 updates per day respectively; however, the exact interval will vary slightly. This also includes an interval tracking option of 20 events/year. An interval event = 15 min. updates for 50 events (which equals 12.5 hours of continuous tracking). Thereafter, the device goes back to the update rate assigned to it.

**Can only ping when unit is not in deep sleep mode, unit will report an Auto Locate before entering sleep mode and will wake up on motion or ignition.

***Ignition wire needs to be connected.

****BAT60 Geofence alerts will be delayed based on reporting interval assigned to unit.

*****AT312-EQ – Once the 1 mile perimeter fence is broken, the unit will track at 30 minute intervals. It will perform an Auto Locate every 8 hours without power and every 24 hours with power.

*****AT312-TT – Once 3 miles or more is traveled, the unit will track at 30 minute intervals. It will perform an Auto Locate every 8 hours without power and every 24 hours with power.
